

Sylvester Obiwuru Oputa

Backend Engineer · APIs, Payments & Multi-Tenant Systems

Lagos, Nigeria | Remote · Contract · On-site | +234 903 490 1283

sylvesteroputa366@gmail.com | github.com/Sylester-Oputa | linkedin.com/in/sylvester-oputa | sylvester-oputa.site

PROFILE

Backend engineer with 4 years building production software, specialising in REST APIs, multi-tenant SaaS architecture, and payment and escrow flows. Primary stack is TypeScript on Node/Express with Prisma and PostgreSQL. Has shipped backends for e-commerce, ticketing, project management, gamified content and property platforms — several under commercial contract — covering authentication and RBAC, payment integration, background workflows, caching, testing and CI/CD. Comfortable owning a service from schema design through to deployment and monitoring.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (Node.js), SQL, Python

Backend: Express, Node.js, REST API design, NextAuth.js, Supabase Auth, JWT, 2FA, RBAC & object-level permissions, Socket.IO, Swagger/OpenAPI

Data: PostgreSQL, Prisma ORM, Redis, SQLite, schema design, migrations, audit logging, FIFO stock allocation

Payments & Integrations: Paystack, escrow, wallet and payout flows, Cloudinary, OpenAI, Mapbox

DevOps & Tooling: GitHub Actions CI/CD, Winston structured logging, Jest, Playwright, Git, Vercel

Practices: Multi-tenancy, workflow orchestration, GDPR data export, schema-contract checks in CI, Agile delivery

EXPERIENCE

Creative Natives — Full-Stack / Product Engineer (Remote)

Jul 2026 – Present

- Building T.I.N. (This Is Naija), a cultural, social and accountability platform spanning web, API and mobile.
- Node 24 + Prisma API serving a Next.js 16 / React 19 web client and an Expo mobile client with EAS builds.
- Implemented a fact-checking pipeline, reputation systems, moderation workflows and realtime feeds over Socket.IO.

Emblue Africa — Full-Stack Engineer, Contract (Remote)

May 2026 – Aug 2026

- Delivered core platform functionality for a social intelligence product: Reply Engine, Dashboard, Approval Queue and "Engage the Engagers."
- Built Supabase Auth with Prisma-backed RBAC and object-level permission enforcement.
- Shipped a campaign lifecycle engine with Playwright end-to-end coverage and schema-contract checks in CI.

JoinTearn — Backend Developer, Contract (Remote)

Feb 2026 – Apr 2026

- Admin dashboard API for a gamified content platform, documented with Swagger.
- Role-based access across Admin, Moderator, Creator and User tiers.
- Content moderation workflows, a reward points system, and Redis caching.

OA Softwares — Backend Developer, Contract (Remote)

Jan 2026 – Mar 2026

- Milestone-based project delivery API in TypeScript and Prisma, with consultation management.
- Set up CI/CD with GitHub Actions, Winston structured logging and Jest test coverage.

Novnuga — Backend Developer, Contract (Remote)

Jan 2026 – Feb 2026

- Production e-commerce API exposing 113+ endpoints.
- Built 2FA, login tracking, device management and GDPR-compliant data export.
- Integrated Paystack payments, Cloudinary uploads and a traffic analytics dashboard.

- MAR ABU Projects Services** — Full Stack Developer, Contract (Remote) *Jul 2025 – Oct 2025*
- JIRA-like project management system supporting Agile, Waterfall and Kanban workflows.
 - Booking platform built on NextAuth.js, Prisma and PostgreSQL.
 - Role-based dashboards, sprint management and audit logging; Redis for real-time board state.

SELECTED BACKEND PROJECTS

Stayza Pro · Product & Full-Stack Engineer *In development*
B2B booking infrastructure for Nigerian shortlet operators. Multi-tenant property and booking management, wallet and payouts, 50/50 escrow, a three-lane dispute model, cancellation and pricing rules, WhatsApp-first guest communication and branded subdomain storefronts.

Next.js · TypeScript · PostgreSQL · Prisma · Paystack · Mapbox

Paymarka · Product Engineer *Client delivery*
Contract-to-payment platform covering the proposal → agreement → invoice → payment → receipt lifecycle, with AI-assisted proposals, e-signatures, escrow milestone deposits, verifiable transaction records and a full audit trail.

Next.js · TypeScript · Express · Prisma · Paystack · OpenAI

Vortex Island · Backend Developer *Live*
SaaS event ticketing platform with event creation, guest checkout, quota-based subscriptions, FIFO stock management and Paystack payment integration.

TypeScript · Express · Prisma · PostgreSQL · Paystack

Novnuga E-Commerce API · Backend Developer (Contract) *Live*
113+ endpoint commerce API with two-factor authentication, device and login tracking, traffic analytics, Cloudinary media uploads, Paystack payments and GDPR data export.

TypeScript · Express · Prisma · PostgreSQL · Paystack

Finance Tracker API · Personal Backend Project *Live*
Backend-first personal finance system with JWT authentication, email verification and password resets, income and expense tracking, an analytics dashboard and Excel export.

Node.js · Express · PostgreSQL · Prisma · JWT · React

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science (Part-Time, in progress) — Lagos State University, Ojo Campus *2025 – Present*

National Diploma, Computer Science — Ogun State Polytechnic, Ijebu-Ode *2021 – 2023*

Certificate — Frontend Development (TypeScript / Next.js) — Nerdy Eye, Remote *Jun 2025*

Certificate — Backend Development (Python / Django) — Tech 365, Ikeja *Jun – Sept 2022*
